CLIENT TESTIMONIALS:

"We appreciate your care. Thank you very much for taking care of my mom, while I was busy working"

AT CARE FOUR HOME ASSISTANCE.

WE UNDERSTAND. WE GET IT. AND WE'VE GOT YOUR SOLUTION.

Care Four Home Assistance is a leading provider of personal care. When loved ones are discharged from the hospital, the effect of their conditions are not necessarily gone once they return home. This often makes it difficult for them trying to adjust back to daily life, increasing the risk of re-admission. Care Four Home Assistance can help make that transition back to home easier with our in-home care services.

OUR MISSION:

To provide exceptional and efficient home care services to our vulnerable seniors, sick, the physically challenged and needy in the comfort of their home.

OUR VISION

We at Care Four Home Assistance share our mission, values and vision statements as a way of showcasing our services.

CORE VALUES

1. Respect
2. Integrity
3. Loyalty
3. Professionalism

OUR SERVICES

Our professional Caregivers provide expert assistance with the activities of daily living for those with physical or medical challenges. We ensure the safety, comfort, dignity and quality of life that staying at home can provide. Our services include:-

- Evaluating the client before take over and gets to know the client needs and requirements
- Communication with family and healthcare providers. Talking to the doctors and family ensures that everyone has the same information which is an important step towards healthy recovery.
- A Live-In caregiver provides the appropriate level of personal care and support services for clients who need the security of another person in their homes throughout the day, but do not require constant shifts of care. "Live-Ins" provide safety and companionship
- Medication reminders. One of the main reasons for a slower recovery is improper use of medications. Our caregivers can help make sure that they are taking what they need, when they need it.
- Keeping records of doctors appointments and monitoring medications.
- Meal preparation. Eating nutritious meals is the foundation of health. We can advise on how to fix meals for any diet even for dietary requirements.

FREE EVALUATIONS
